Liam Matheson

IT graduate (NSCC, 2026) with hands-on experience in embedded systems and full-stack development, seeking an entry-level IT role.

EDUCATION

NSCC, Halifax/Ecampus— *IT Programming Diploma*

SEPTEMBER 2024 - APRIL 2026

PROJECTS

NSCC Model Rocket – Capstone Team Project

- Collaborated with a 2–3 person team using an agile/sprint workflow, delivering progress updates in weekly presentations
- Programmed the Arduino-based flight computer to capture GPS, environmental, and IMU telemetry during flight
- Designed and built a wireless launch controller circuit for remote ignition
- Contributed to 3D modeling/CAD design of rocket components, refined through an iterative design process across multiple test builds
- Participated in successful rocket launches, collecting and validating real flight telemetry data

SKILLS

- **Programming & Development:** C, C++, C#, Java, HTML, CSS, JavaScript, Object-Oriented Programming, Client-Side & Windows Programming
- **Web & Mobile:** React, Android Mobile App Development, XAML, Web Application Development
- **Systems & Networking:** Linux, Windows, Networking and Security, Systems Analysis and Design
- **Professional Skills:** Attention to detail, Time Management, Problem Solving, Project Management

ADDITIONAL EXPERIENCE

Food Service Roles – Savori, Habaneros, Birch and Anchor

- Maintained attention to detail and quality standards in fast-paced, deadline-driven environments
- Collaborated with team members to troubleshoot problems and keep operations running smoothly
